SIXTH INTERNATIONAL DRYING
SYMPOSIUM IDS'88

VERSAILLES (France)
September 1988

Volume I: Keynote Lectures
Oral Presentations

Chairmen: Pr M.A. ROQUES, ENSIC-INPL
(Nancy - France)
Pr A.S. MUJUMDAR, Mc Gill University
(Montréal, Canada)
CONTENTS

KEYNOTE LECTURES

I "Fluid flow, residence time simulation and energy efficiency in industrial dryers" - D. REAY, Head of S.P.S. Harwell Laboratory, Harwell, England.

II "Selective drying of mixture-containing products" - E.U. SCHLÜNDER Dr.-Ing., Dr.h.c. INPL, Universität Karlsruhe, F.R.G.

III "The role of irreversible thermodynamics and the Onsager relations in the analysis of drying phenomena" - S. WHITAKER, Professor, University of California, Davis, U.S.A.

IV "Considerations in drying consumer products" - L.R. GENSKOW, The Procter and Gamble Company, Cincinnati, U.S.A.

V "Recent advances in modelisation of coupled heat and mass transfer in capillary-porous bodies" - S. BORIES, Directeur de Recherche CNRS, Institut de Mécanique des Fluides, Toulouse, France.

VI "Prediction of equilibrium and transport properties in cellular foods" - E. ROTSTEIN, Professor, Chem. Eng. Dpt, University of Minnesota, Minneapolis, U.S.A.

VII "Combined fields dewatering techniques" - H.S. MURALIDHARA, Senior Research Scientist, Battelle, Colombus, U.S.A.
ORAL PRESENTATION

1. FLUID BEDS

* Fluidized bed drying of polypropylene powder - AGGARWAL R. and DATTA A., R&D Department, Engineers India Ltd., New Delhi, India.

* Selective drying in fluidized beds - SCHWARZBACH J. and SCHLUENDER E.U., Institut für Thermische Verfahrenstechnik, Karlsruhe, F.R.G.

* Studies on the drying of some pharmaceutically important basic ingredient and formulation granules in a batch fluid-bed dryer and to correlate the drying data - NANDA A., BASU K. and GUHATHAKURTA S., Div. of Pharm. Eng., Jadavpur University, Calcutta, India.

2. SOLAR DRYING

* Solar assisted dryer for seeds - IMRE L., FABRI L., GEMES L. and HECKER G., Technical University, Budapest, Hungary.

* Simulation of the field drying of hay - TUZET A., INRA, Thiverval-Grignon, France.

* Simulation and validation of a solar drying lumber model - PALLET D., Ceemat-Cirad, CTST-Cirad, IMP-Perpignan, France.

3. THERMOPHYSICAL PROPERTIES

* Estimation of effective thermal conductivity of rice in bulk - OSHITA S.I. and NAKAGAWA K., Mie Univ., Tsu-Shi, Japan.

* Fast measurement of the hygrothermal properties of a porous material under hygroscopic conditions - BASTIAN G., E.N.S.M., Nantes, France.

* Moisture transfer coefficients of wood and wood-based panels - KOINONEN H., Helsinki Univ., Helsinki, Finland.
4. SPOUTED BEDS

* Drying liquid materials in a spouted beds - BARRETT N., Davis Gelatine Ltd, Botany, Australia and FANE A.G., Univ. of N.S.W., Kensington, Australia.

* Drying of pastelike materials in spouted bed - RE M.I., Cefer-Ipt, Sao Paulo, Brazil and FREIRE T., Univ. Federal de Sao Carlos, Sao Carlos, Brasil.

* Resistance of rough rice to airflow and other studies in spouted bed dryers - ALVES-FILHO O., Escola Sup. de Agricultura de Lavras, Lavras, Brasil.

5. DRYING KINETICS: General aspects

* Equipment and methods of thin-layer drying - a review - SOKHANSANJ S. and CENKOWSKI S., Univ. of Saskatchewan, Saskatoon, Canada.

* Study on intermittent drying of rough rice in a recirculation dryer - TOYODA K., Kobe Univ., Kobe, Japan.

6. INFRARED AND MICROWAVE DRYING

* Accéléeration of white ware ceramics drying rates using hot air and microwaves - VOUILLÉMÉT M., Sté Francaise de la Céramique, Paris, France and MARCHAND M., EDF-ADIE, Moret/Loing, France.

* An analysis of the efficiency of a radiative dryer - LAMPINEN M.J. and SIEVÄNEN M., Univ. of Helsinki, Espoo, Finland.

* Development of an equipment for combinational microwave and hot air agglomerating-drying for food powders - SZABÓ G., Univ. of Food Ind., Szeged, Hungary and DORNYÉY J., Compak Company, Budapest, Hungary.

7. ROTARY and DRUM DRYERS

* Analysis of volumetric heat transfer coefficient and simulation of particles drying in a rotary dryer - HIROSUE H., YAMADA N., ABE E., Government Industrial Research Institute, Kyushu, Tosu, Japan and SHINOHARA H., Fukuoka Univ., Fukuoka, Japan.  

* A model for the rotary drying of granular fertilizers - BRASIL G.C. and SECKLER M.M., CEFER, Sao Paulo, Brazil.  

* Kinetics of moisture sorption in a mixture of heated granular zeolite and grain - ALIKHANI Z., RAGHAVAN G.S.V. and MUJUMDAR A.S., McGill Univ., Montreal, Canada.  

8. DRYING KINETICS : Models

* Experimental and numerical study of drying. Compared behaviours of two building materials - DAIAN J.F. and MEROUANI L., Institut de Mécanique, St Martin d'Hères, France.  

* Marangoni convection in porous solids. Effect on pervaporation and drying - SCHWARBACH J. and SCHLUNDER E.U., Institut für Thermische Verfahrenstechnik, Karlsruhe, F.R.G.  

* A model of drying applied to softwoods : the effect of gaseous pressure below the boiling point - PERRE P., FOHR J.P., ARNAUD G., Laboratoire des Systèmes Energétiques et Thermiques, Poitiers, France.  

* An integral model for convective drying of hygroscopic and non-hygroscopic materials - CHEN P. and SCHMIDT P.S., Univ. of Texas, Austin, U.S.A.  

* A simplified study of moisture transport and shrinkage in wood, LARTIGUE C., PUIGGALI J.R. and QUINTARD M., ENSAM, Talence, France.  

9. STEAM DRYING

* Natural convection and interfacial phenomena in the evaporation of superheated water - YANG C.J., MAA J.R. and YANG Y.M., National Cheng Kung Univ. Tainan, Taiwan, R.O.C.  

* Superheated steam drying of porous particles in a packed bed - KHAN J.A., ALATAS B. and BEASLEY D.E., Clemson Univ., Clemson, U.S.A.  

10. SPRAY DRYING AND DROPS: A

* The thermal dehydration of pulp in a large-scale steam dryer - BOSSE D. and VALENTIN P., Süddeutsche Zucker AG, Mannheim, F.R.G.  OP. 337

* Factors governing temperature and humidity fields in spray drying - PAPADAKIS S.E. and KING C.J., Univ. of California, Berkeley, U.S.A.  OP. 345

* Numerical prediction of spray dryer performance - FILKOVA I., Czech. Techn. Univ., Prague, Czechoslovakia.  OP. 353

* The experimental study of power consumption in centrifugal spray drying process - XU J.X. and WU S.J., Tongji Univ., Shanghai, China.  OP. 357

* An experimental study on evaporation rate into a superheated steam using laser holographic interferometry - NOMURA T., NISHIMURA N., and HYODO T., Osaka City Univ., Osaka, Japan, and KASHIWAGI T., Univ. of Agriculture and Techn., Tokyo, Japan.  OP. 365

* The aerodynamics of co-current spray dryers - OAKLEY D., BAHU R. and REAY D., Harwell Laboratory, Oxfordshire, England.  OP. 373

11. DRYING KINETICS: Deformable materials

* Effect of shrinkage on drying behaviour of potato slabs - SUAREZ C. and VIOLLAZ P.E., F.C.E.yN., Bueanos Aires, Argentina.  OP. 385

* Shrinkage during drying and devolutilization of wet coal - WILDEGGER-GAISSMAIER A.E. and AGARWAL P.K., Univ. of Adelaide, Adelaide, Australia.  OP. 391

* Drying of natural rubber: morphology and internal transfer of water - AURIA R., Institut Français de Recherche Scientifique pour le Développement en Coopération, BENET J.C. and COUSIN B., USTL, Montpellier, France.  OP. 397

* Variable diffusivity model for drying of highly deformable materials - KECHAOU N. and ROQUES M.A., ENSIC-INPL, Nancy, France.  OP. 403

12. VACUUM, FREEZE AND CONTACT DRYING

* Atmospheric freeze-drying: experimentation and modelisation - WOLFF E. and GIBERT H., INRA and INAPG, Thiverval, France.  OP. 411

* An analysis of the combined vacuum conductive-radiative drying - NASTAJ J., Techn. Univ. of Szczecin, Szczecin, Poland.  OP. 417

* Modelisation and simulation of drum-drying - ABCHIR F., VASSEUR J. and TRYSTRAM G., ENSIA, Massy, France.

13. SPRAY DRYING AND DROPS : B

* Simulation of simultaneous spray reaction and drying system - CHANDER H., GHOSH P.K. and NARANG H.P., National Physical Laboratory, New Delhi, India, BAVEJA K.K. and DHINGRA S.C., Indian Institute of Technology, New-Delhi, India.

* Effect of viscosity on spray drying of milk - HAYASHI H. and KUDO N., Snow Brand Milk Products Co., Tokyo, Japan.

* Preparation of fine particles of cobalt oxide by spray and freeze drying of aqueous salt solution - MATSUDA H., KUMAZAWA K. and HASATANI M., Nagoya Univ., Nagoya, Japan.

* The drying of free-falling droplets of concentrated skim-milk - FLICK D., LENOIR Ph. and GIBERT H. - CEMAGREF, Antony, France.

14. EXTERNAL TRANSFERS AND EVAPORATION

* On the mechanism of the constant drying rate period - SCHLUNDER E.U., Institut für Thermische Verfahrenstechnik, Karlsruhe, F.R.G.

* Selective evaporation of a ternary mixture containing one non-volatile component - RIEDE Th. and SCHLUNDER E.U., Institut für Thermische Verfahrenstechnik, Karlsruhe, F.R.G.

* Effects of saturation heterogeneities on the interfacial mass transfer relation - MANEVAL J.E. and WHITAKER S., Univ. of California, Davis, U.S.A.

15. GENERAL ASPECTS OF THE DRYING PROCESS

* On the interaction of product qualities and performance of drying - BUHLER W. and LIEDE W., BASE, Ludwigshafen, F.R.G.

* The drying of sawgoods with heat pumps in France: technical and economical aspects - SMADJA P., EDF, Chatou, France.

* Drying research and development in P.R. China - ZHANG Y.F., PAN Y.K. and WEI Z., Tianjin Institute, Tianjin, China.
Minimum energy thermodynamic cycles for determined thermal process and application to drying - NASSIKAS, A.A. and AKRITIDIS C.B., Univ. of Thessaloniki, Greece.

Wet problem regions remaining after in-bin drying: a two-dimensional model showing the formation of cool wet wall-regions during in-bin drying of wheat - WILSON S.G., Stored Grain Research Laboratory, Hightett, Australia, and NGUYEN T.V., Division of Mineral Engineering, C.S.I.R.O., Clayton, Australia.

Simulation of deep bed drying of particles - RATTANAPANT O., LAGUERRE J.C. and BIMBENET J.J., ENSIA, Massy, France and LEBERT A., INRA, Massy, France.

Computer simulation of effects of exhaust air recycling on the performance of a batch through-flow dryer - TANTHAPANICHAKOON W. and CHIJANMINGKwan C., Chulalongkorn Univ., Bangkok, Thailand.

Analysis of the performance of a cascade type rice dryer - HELVACI S.S. and PEKER S., Ege Univ., Izmir, Turkey.

17. DESHUMIDIFICATION OF AIR AND OSMOTIC DEHYDRATION

The "dry-absorb" process: drying with air dehydrated by absorption in an hygroscopic solution - LE GOFF P. and BOUGUELLA A., LSG-CNRS-ENSIC-INPL, Nancy, France and DESMORIEUX H., ENSIAA, N’Gaoundere, Cameroun.

Osmotic dehydration: study of mass transfer in terms of engineering properties - RAOULT-WACK A.L., LAFONT F. and GUILBERT S., Ceemat, Montpellier, France.

Liquid sorption drying utilizing mechanical energy and desorption by air - SCALABRIN G., Padova Univ., Padova, Italy.

Studies of the drying kinetics of air flow through thin layers of silica gel - KRAVCHIK, T., KORIN E. and BORDE L, Ben-Gurion Univ. of the Negev, Beer-Sheva, Israel.

18. HUMIDITY and MOISTURE MEASUREMENT and CONTROL

Application of EVM for on-line moisture measurement in drying processes - REILLY P.M., SULLIVAN G.R., WHEALEY M.G., Univ. of Waterloo, Waterloo, Canada, and KRAUEL K.B., DANTEC Electronics, Waterloo, Canada.

Non-invasive measurement of moisture profiles during the drying of an apple - PEREZ E., KAUTEN R. and MC CARTHY M.J., Univ. of California, Davis, U.S.A.

Control system of final moisture content of material in convective dryers - BOLEK E., SPIRNEK J. and WEBER W., Centre of Automation, Lodz, Poland.

Drying of paper: measurement of local moisture content - RUEFF M. and CHARUEL R., Ecole Francaise de Papeterie, St Martin d'Heres, France.
