Objectives

The 6th Maghreb Seminar on Science and Technology of Drying (SMSTS'2017) will take place from 8th to the 10th November 2017 at Marrakech (Morocco). This meeting aims of SMSTS'17 is to provide the most advanced and comprehensive global forum for disseminating new results and data in research, development

and applications in drying/ dewatering sciences and technologies. This seminar aims to bring together leading researchers and engineers from academia and from industry from all around the Maghreb. Also it comes to present a new opportunity to share and discuss the research and development results in this area. The SMSTS'2017 contributes to exploit these results in the energy management field for sustainable economic development. It also helps to strengthen support and consolidate strengthen, Maghreb teams to common interests in the field of drying, upgrading research and strengthening cooperation particularly between Maghreb research teams. Selected papers will be published in major technical journal.

An exposition of industrial equipment is also planned during this meeting.
